

Industrial Fittings

Cargo Pendant

This very substantial fitting was salvaged from an old cargo ship, it has travelled one million miles at sea!

It has been expertly cleaned and restored. The cargo pendant would be ideal for down lighting areas such as breakfast islands, bar tops, dining tables, snooker tables etc.

The lovely patina on the brass makes it stand out as a real statement in its environment. This cargo pendant will impress.

The bulb is a 60watt tungsten which gives a really warm light and looks very unique with the reflector inside the dome. The lamp holder is a ES27(Edison screw).

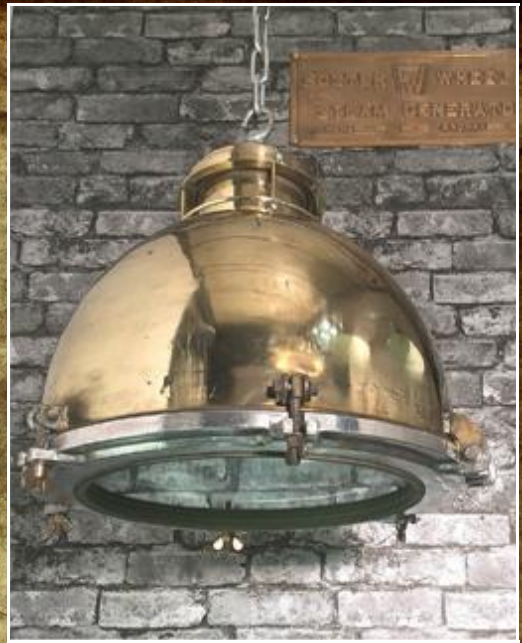

The bulb is replaced by turning the four wing nuts around the rim, this releases the hinged glass lens for access to the lamp, the rim is made of aluminium.
