Morio Denki Copper Flame Proof Wall Light

Made from solid copper this light is manufactured by Morio Denki a Japanese manufacturer of nautical grade electrical fixtures and fittings.

The quality of this item is superb, a build quality you never see these days and is obviously immortal! This light would have been one of hundreds installed on a supertanker indoors and out, originally would have been painted but it has been expertly cleaned back to its raw state which is mainly copper.

The cap on the back has some fantastic detail of the manufacturers serial numbers, weight, type etc and give it excellent character.

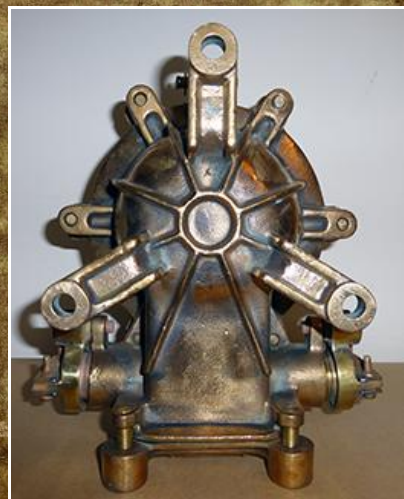

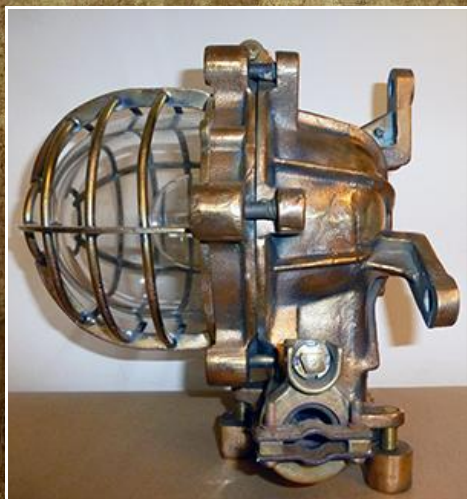

It has been rewired and tested and is ready to hang. The fitting was fitted with a standard 60W domestic bulb mounted on an Edison screw ceramic cap lamp holder.

Product Code	Morio Denki Copper Flame Proof Wall Light
Weight	8.1Kg
Height	260mm
Width	215mm
Depth	230mm
Tripod footprint	Ø180mm
