

Dimming Control

SceneSmart

SceneSmart is a versatile and highly configurable architectural control system.

SceneSmart is uniquely adaptable making it an ideal choice for use in a vast number of applications including smart homes, restaurants, hotels, boardrooms and offices.

The system features include 0-10V, 1-10V, DSI, DALI and RS232 controls. A built-in astronomical clock facilitates events triggered at any time of the day, linked with sunrise – sunset calculations. Any input may control any output with the ability to provide operation of a sequence of events, for example, control of lighting, blind motors, commands to building management systems, colour changing etc.

SceneSmart control panels are supplied with stylish MK aspect screwless fascia plates. Several finishes are available including Brushed Stainless Steel, Polished Brass, Polished Chrome and White. The action / operation of each button can be individually configured to allow selection of lighting scenes, operation of blinds, commands to RS232 devices or any combination of these features.

- System designed for both commercial and residential applications
- Astronomical time clock with full event management
- Configurable button indicator LED
- Protocols: DMX / RS232 / DSI / DALI / 1-10
- Controls: single gang switch plate, double gang LCD Display switch plate
